EDUCATION

- Bennett University, The Times Group** Greater Noida, India
B.Tech – Computer Science and Engineering (Specialisation in AI); CGPA: 8.92 2024 – 2028
Relevant Coursework: Linear Algebra, Probability & Statistics, Machine Learning, Deep Learning, Data Structures & Algorithms, Database Management Systems, Operating Systems

SKILLS SUMMARY

- Mathematics:** Linear Algebra, Probability Theory, Statistics, Optimization
- ML / DL:** PyTorch, TensorFlow, Scikit-learn, NumPy, Pandas, OpenCV, BERT, Vision Transformers
- Languages:** Python, Java, C++, Rust, JavaScript, SQL
- Systems & Tools:** Linux, Git, Docker, Redis, Tokio, FastAPI, $\text{\LaTeX}$

EXPERIENCE

- Publicis Resources** Gurugram, India
Applications Admin Intern – AI/ML June 2026 – Aug 2026
 - Enterprise AI Administration:** Supported and administered enterprise AI-enabled software systems in a production environment, conducting testing to ensure system reliability.
 - Data Compliance & Validation:** Managed Data Subject Access Request (DSAR) workflows and performed rigorous data validation to maintain data integrity and regulatory compliance.
 - System Documentation:** Developed comprehensive documentation on system functionality and operational protocols to streamline administrative workflows for cross-functional MLOps teams.
- Undergraduate Researcher** Bennett University
Independent & Faculty-Guided Research 2024 – Present
 - Computational Neuroscience:** Faculty-guided research on functional connectivity analysis, brain network modeling, and signal synchronization using fMRI and deep learning.
 - Fake News Detection:** Built binary text classification pipelines using BERT and RoBERTa architectures for misinformation detection.
 - Compiler Optimization:** Research exploring compiler-level optimization techniques and systems performance improvements in Rust.
- Research Lead – IEEE & ACM Student Chapters** Bennett University
Leadership & Research 2025 – 2026
 - Research Leadership:** Leading student research initiatives across IEEE and ACM chapters in AI, ML, and systems.
 - Mentorship:** Mentoring juniors in research methodology and academic writing using $\text{\LaTeX}$.

PROJECTS

- Advanced fMRI Functional Connectivity Analysis Framework (GitHub):** Comprehensive Python toolkit for fMRI functional connectivity analysis with coherence metrics, network analysis, statistical testing, and visualization.
- Bug Bounty Hunter Toolkit (GitHub):** Automated reconnaissance framework integrating subdomain enumeration, vulnerability detection, and OSINT workflows.
- Redis Client in Rust (GitHub):** Minimal asynchronous Redis client built using Tokio, focused on high performance and concurrency.
- BitTorrent Client in Python (GitHub):** Lightweight, asynchronous BitTorrent client implementing core protocol functionality including peer communication, piece management, and concurrent file downloading using sockets and asynchronous I/O.

HONORS AND AWARDS

- NST GenAI Hackathon – Special Jury Award:** Wraith OS – RetroCloud (FastAPI, Python, Shell, Cloud Systems), a lightweight cloud file management prototype. (LinkedIn)
- Project Showcase 2025 (Bennett University × Times of India) – 2nd Runner-Up:** TerraVit (Vision Transformers, Satellite Imagery, Climate AI), an AI-powered climate intelligence system. (LinkedIn)
